Summary

AI/ML Engineer with experience building and deploying end-to-end machine learning systems in production. Skilled in Generative AI, LLMs, and RAG-based solutions, with a strong focus on data handling, feature engineering, and extracting meaningful insights from large datasets to improve model performance and reliability.

Work Experience

- **AI/ML Engineer | Testiva** **March 2026 – Present**
 - Built end-to-end testing and evaluation tools for **AI Voice Agents** and **AI Medical Scribe applications**, covering speech recognition, LLM responses, tool calling, accuracy, latency, and automated evaluation metrics.
 - Evaluated and red-teamed **RAG applications, multi-agent systems, voice agents, and AI scribe applications** for retrieval accuracy, hallucinations, response quality, prompt injection, jailbreaks, and security vulnerabilities.
- **Associate AI/ML Engineer | Siber Koza Alpha (Dassoft)** **Sep 2025 – March 2026**
 - Fine-tuned Qwen vision model for image captioning using Hugging Face and PEFT/LoRA, deployed on RunPod GPU server for production inference.
 - Built and maintained LangGraph and LangChain RAG pipelines for intelligent document retrieval and context-aware response generation, implementing Adaptive and Corrective RAG strategies to improve response accuracy and reduce hallucinations across multiple enterprise queries.
- **Data Science Intern | 10Pearls Pakistan** **June 2025 – August 2025**
 - Built an AQI prediction system achieving 87% accuracy using real-time data from 15+ monitoring stations, processing 50K+ data points hourly with a streamlined feature engineering pipeline.
 - Implemented CI/CD pipelines with GitHub Actions, reducing model deployment time by 75% and enabling scheduled weekly retraining through continuous model optimization and performance monitoring.
- **AI/ML Intern | Siber Koza Alpha (NASTP)** **March 2025 – May 2025**
 - Enhanced LangGraph-based agentic workflow detecting 12+ cyberattack patterns with 89% precision.
 - Developed a RAG chatbot using LangChain and LLaMA 3, achieving 92% answer relevance on 2K+ cybersecurity queries and improving analyst decision-making efficiency by 40% through intelligent document retrieval.

Education

- | | | |
|---|------------------------|----------------------------|
| BSc Artificial Intelligence | NUML, Islamabad | Jan 2022 – Jan 2026 |
| • GPA: 3.3/4.00 | | |
| • Relevant Coursework: Machine Learning, NLP, Computer Vision, Data Mining, Deep Learning, Statistical Analysis | | |

Projects

- **LangGraph RAG Trinity**
 - Expanded a RAG agent using LangChain and LangGraph, delivering 92% relevant answers on 1K+ queries.
 - Implemented Adaptive, Corrective, and Self-RAG strategies, reducing hallucinations by approximately 20%.
 - Maintained citation-backed outputs for reliable technical responses.
- **Vehicle Insurance End-to-End MLOps Pipeline**
 - Built an end-to-end pipeline on 100K+ records, achieving 88% claim prediction accuracy.
 - Tracked 50+ experiments via MLflow for reproducibility and model selection.
 - Deployed best model via FastAPI and Docker on AWS EC2, serving 500+ daily predictions.
- **Air Quality Forecasting System (Islamabad)**
 - Built AQI forecasting system achieving 82% accuracy for 24-hour predictions across PM2.5, PM10, and CO metrics.
 - Deployed via FastAPI and Streamlit with hourly updates from OpenWeather API, maintaining 95% uptime.
 - Integrated 6-month historical data analysis for trend visualization and seasonal pollution pattern comparison.

Technical Skills

- **Programming & Tools:** Python, SQL, Git, Docker, FastAPI, MLflow, DVC, LangChain, LangGraph, Hugging Face
- **Machine Learning & AI:** Deep Learning, Computer Vision, NLP, Generative AI, Agentic AI, LLM Fine-tuning
- **Data & Cloud:** MongoDB, PostgreSQL, Pandas, NumPy, TensorFlow, PyTorch, AWS (EC2, S3)
- **Data Science:** Data Analysis, EDA, Feature Engineering, Statistical Modeling, Data Visualization

Certifications

- Oracle Cloud Infrastructure 2025 Data Science Professional (1Z0-1110-25) [Verify](#)
- Oracle Cloud Infrastructure Generative AI Professional [Verify](#)
- Complete Generative AI with LangChain and Huggingface [Verify](#)
